Burday, August 28—5 P. M.

During the past week the tendency of prices can been upward. Most of the fancies, at the close yesterday, exhibited an improvement ranging from one quarter to seven per cent. This has been much greater than the most sanguine could have anticipated, but the probability is, very few will realize even at this advance. The relief in the public mind produced by the favorable intelligence by the Pacific and Arable, relative to the case. reliate in the public mine produced by the archane in lelligence by the Pacific and Arabia, relative to the ques-tion of war between Russia and Turkey, has been the principal cause of this rise in prices, and operators have evidently lest sight for the time, of the local causes of the recent depression. The condition of our money market must, as soos as the little speculative excitement now existing passes away, tell upon stocks. The banks are atreagthening hemselves by additions to their specie, but they are not keeping up their line of discounts. The contraction is still going on, while the season for heavy pay-ments is rapidly approaching. The non-shipment of specie, with the receipts from California, must add largely to the supply, but the banks do not get much of it. The capacious vaults of the Sub-Treasury swallow up nearly a quarter of a million daily. Upwards of nine and a quarter millions of dollars were in the Sub Tressury at the close of business on Saturday. Last week, the exportation was c neiderably less than half a million of doilars. This week there will be two steamers from this port, and the export may be much larger, in which event the banks will not, at the close of next Saturday, show such a favorable condition. The aveterious operations of the transfer clerk of th Phrenix Coal Company appear no mearer solution than when the Board of Directors made the official announce ment that after long and patient investigation, they had found a mare's nost. We are auxiously waiting the promised further particulars, but if their investigations de not progress more rapidly than they have thus far, it will be some weeks before we shall have another specia edict. In the meantime the public are requested not to te certain certificates, for the company have not yet decided shether to pronounce them forgeries or not. As there may be more of the same sort left, either in the hands of the company or of individuals, it would be the nafest course not to negotiate anything in the shape of a certificate of stock of the Phoenix Mining and Manufac-Company of the State of Virginia. with forged signatures and filling up. The result of the proceedings was as follows:—

Ist. That the amount of such paper in circulation is comparatively small, and may be, by the information here given, readily desected.

2d. That in all such frauds the names of the registers, as well as those of the presidents and cashiers, and the filling up, are forged; and the numbering is imperfectly executed, and is in striking contrast with the genuine figures of the register on the true notes.

2d. That we have discovered no frauds of this description on the following named banks, to wit—

Union Bank of Sandusky city.

Franklin Bank, of Portage county.

Bank of Commerce, Cleveland

Merchants' Bank of Massillon.

Stark County Bank.

Fickaway County Bank.

Iron Pank of Ironton.

4th. Measures have been taken to procure a new plate, on which to print the circulation of said banks, as soon as the same can be prepared, and that no mere impressions of the old plate will be issued. As the circulation of the State stock banks of the State of Ohio is well secured by Ohio and United States stock, deposited with the Auditor of State, and is unquestionably good, with the exception of the frauds above named, we cantion the public against any sacrifice on it, and assare them that no loss can possibly attend any of the genuine notes of said banks.

an official source.

At the first meeting of the Board—7th July last—the executive committee were authorized to take measures for double tracking the road from Syracuse to Buffalo, without delay, and to adopt all such measures as they might, on examination, deem necessary to put the entire line of road from Hudson river to Lake Erie, with its rolling stock and machinery, in the very best condition.

dition.
In pursuance of this resolution, ten thousand tons of fron have already been purchased or or ordered, and is now in course of delivery.

Nearly the entire line of road has been examined by competent engineers, and the board, at their meeting on the 28th of July, ordered the repairs and improvements suggested by them to be made under the direction of the examine committee.

Twenty-reven additional locomotives have been pur-chased or ordered, and four hundred new freight cars are in process of construction.

Fifty first class passenger cars are also about to be or-

are in process of construction.

Fifty first class passenger cars are also about to be ordered.

Arrangements are making at Buffalo to increase the freight ascommodations at that point. Extensive improvement in the buildings on the line will be made as soon as possible. At Abbary a new engine and freight house are now erecting, and grounds have been purchased for a spacious passenger depot. These various improvements will probably cost over three millions of dollers. It will, of course, require considerable time to effect from, but it is determined to make the road a complete double track road from Hudson river to Lake Eric, which, in all its arrangements and soom modations, shall quite equal, if not excel, any road is the country. The greater part of the means necessary for these purposes has been secured by the present capital, and no resort to are further issue of the stock for the purpose will be needed.

The charge that the wages of any of the men on the road have been unfairly reduced is unfounded. Some have been reduced, where it is thought proper to do so; others, and soft a few, have been increased, according to their abilities and the labor performed. No injustice has been intended to any person and no parsimonious policy has been adopted. The labor of conductors will be reduced instead of a being increased. A conductor who formerly parsed over the Utica road twices day, one hundred and afty six miles, will now go from Albany to Syracuse, the ether from Syracuse to Buffalo; giving about one hundred and fifty miles for the day's work of a conductor. Over the bundred tons of new iron have already been put down in place of sid iron removed, and all the rolling stock of the road is undergoing the most thorough examination and repair.

DORSES! HORSES! HORSES!—MANY VERY valuable horses have been lost recently, through the effects of a distemper now raging in all parts of the country. It seems like a very had cold and inflammation of the lungs; also a discharge from the head and a swelling under the threat, like the ordinary distemper. Br. Lyman Seely, of Yonkers, lost a fine horse. Dr. KELLINGER has been called to many, but has not lost a single case. He resorted to no other treatment than to give the Manhattan Equatian Condition Powders, bathe the head and throat freely with Kellinger's Linimout, wat a sponge with the lit imment and hold it to the nostrils, let the animal; inhale it squeezes little into the nostril, which will make him snort and ough and clear the head by discharging freely. By all mans give the Powders. In large packages, at 500.—12 in a package—No. 476 Erondway.
